EMPLOYMENT HISTORY

Frontend Developer, Sutrix Solutions, Tan Binh District, Ho Chi Minh

OCTOBER 2011 — JUNE 2017

- Implemented responsive web design.
- Provided constructive feedback during code reviews.
- Conducted thorough cross-browser and cross-device testing.
- Collaborated closely with the design team for pixel-perfect UI/UX implementation.

- Worked in Agile methodology, actively participating in daily stand-up meetings, sprint planning, and retrospectives for efficient project execution.

Senior Frontend Developer, Titan Technology Corporation, Phu Nhuan District, Ho Chi Minh
JULY 2017 — JULY 2018

- Mentored new developers, accelerating their on-boarding process.
- Developed and optimized front-end UI components to enhanced user experience.
- Collaborated with clients, ensuring client satisfaction by providing support and gathering feedback throughout SCRUM management.
- Contributed to code reviews and performed quality assurance checks, maintaining coding standards and identifying areas for improvement.

Frontend Team Leader, GVS Technology, 10th District, Ho Chi Minh
JUNE 2018 — NOVEMBER 2019

- Assisted in recruitment, training, and monitoring team productivity.
- Optimized front-end development practices, driving efficiency and demonstrating expertise.
- Ensured adherence to procedures and code standards through regular code reviews and feedback.
- Provided thought leadership, driving innovation through new approaches, workflows, and technologies.
- Held a multifaceted role in design, coding, troubleshooting, and collaboration with the project team and customers.

Senior Frontend Developer, Appman, Bangkok, Thailand
NOVEMBER 2019 — PRESENT

- Successfully transitioned to remote work, maintaining consistent productivity and communication with the Thai company despite the geographical distance.
- Collaborated effectively with a distributed team, utilizing digital communication tools to ensure seamless coordination and timely project delivery.
- Demonstrated adaptability and resilience while working in a remote setup, effectively managing time and tasks to meet project deadlines.
- Proactively sought opportunities to learn and implement new technologies, keeping up with the latest trends and industry advancements in front-end development.

PROJECTS

SUEZ
- Developed a highly responsive site using HTML/CSS (PUG/SASS), jQuery, and Sitecore (.NET framework).
- Utilized modern technologies like HTML5 (PUG) and CSS3 (SASS) to create a functional and visually appealing website.
- Collaborated with the Back-end team to fix layout bugs during integration development.
- Optimized performance and load times for seamless user experience.
- Implemented Sitecore for efficient content management.

ANTIK BATIK
- Collaborated with overseas clients as an outsourced project for a French brand designer.
- Translated Photoshop designs into pixel-perfect web pages using HTML, CSS, jQuery, and PHP.
- Supported back-end development in integrating the front-end code seamlessly.

ROBOWORLD
- Developed the marketing website for a NFT branding game, Roboworld.io, using React.js.
- Implemented the latest metadata practices to optimize the website for search engine optimization (SEO).

ISO

- Developed a marketplace platform, ISO.gg, to facilitate easy buying and selling of various items.
- Built the platform using Next.js, GraphQL, and Apollo Client, ensuring efficient and scalable functionality.
- Collaborated closely with the mobile team to integrate the website seamlessly into webviews.
- Successfully met a tight deadline by kick-starting the project within just one week.

SNAPEDIT

- Developed the Snapedit website, an image manipulation platform with AI capabilities for a Vietnamese startup company.
- Utilized Next.js and the Canvas API as the core technologies to build the platform.
- Leveraged the power of the Canvas API extensively to provide robust and advanced image manipulation features.
- Contributed to the development of an innovative platform that empowers users to enhance and transform their images using AI technology.

EDUCATION

Bachelor of Engineering, Can Tho University, Can Tho

2007 − 2011

- TOEIC 770 - IIG Viet Nam
- JLPT N4, N5 (Japanese-Language Proficiency Test)
